Clean Energy for Eversource customers with Ampion

Save an average of 10%
on the cost of electricity
with Community Solar!

Your discount is locked in for as long as you participate

No panels on your property, or investment required

This agreement lasts for 3 years and is automatically renewed

Eversource customers are lowering their electricity costs, supporting the state's clean energy economy and helping reduce our dependence on fossil fuels through Community Solar.

How does it work?

1

We assign you a share of the local community solar farm based on your electrical usage

2

Each month, solar credits are generated on your behalf and applied directly to your utility bill

3

You purchase Ampion's solar credits at a discount, saving you 10% on your total electricity costs

4

Once connected, you can view your solar production, cost savings, and environmental impact with Ampion's solar portal

Signing up is really simple. It only takes 5 minutes to save 10% on your electricity cost.
